Executive Summary for Moldova: 2022 At a Glance

2022 was a year of challenges for Moldova, with the Russia's invasion of Ukraine creating security issues for this bordering republic, as well causing loss of external markets, problems with energy supply and a general disruption to normal business networks. Nonetheless, the impact of these events upon SMEs was mitigated by the support from the EU4Business Initiative. Turnover grew, there was an increase in exports by businesses already working in international markets and new jobs were created. Furthermore, it appears that the SMEs had fully recovered from the impact of COVID-19, prior to the war.

Impact of EU Support in Moldova

Results per Pillar

Stephen Tupper

Team Leader,
EU4Business
Facility

In 2022, the EU4Business Initiative continued its sustained support to micro-, small and medium business in Moldova, building on the results of prior years in terms of increases in turnover and employment. It did so, in spite of an extremely difficult environment, caused by the Russia's invasion of Ukraine, characterized by the breakdown or disruption of key trading patterns. In many cases, Moldova outperformed the EaP average and business development services provided to exporters are a case in point.

A9	€3.99 million	

Types of Support Included in Access To Finance

A1 Capped Loss Recovery

This is a risk-sharing instrument in the form of a grant that the EU provides to an IFI. This grant is used by the IFI to partially cover the loss that any PFI, such as a local bank, would carry as a result of SMEs not repaying part or all of its loan. In this way, the PFIs feel more comfortable and are willing to use the credit lines from IFIs to lend to SMEs. However, the EU grant only partially covers the potential loss that PFIs could suffer. The recovery of loss covered by this EU risk sharing instrument is generally up to 10% of the total loan portfolio of the respective PFI (total value of the loans disbursed by the PFI from the respective credit line of the IFI) and generally up to 50% of each individual sub-loan. This actually means that if an SME does not pay back the loan to the local bank, the EU grant for capped loss recovery can actually cover half of the loss of the bank. In this way, the local banks are more willing to disburse loans to SMEs which are generally perceived as high-risk borrowers.

A2 Interest Subsidy

This instrument is a grant given by the EU to IFIs in order to lower the cost of their loans to SMEs in the EaP. The grant provides interest subsidies of up to 10%, which is applied to the regular interest rate, at which the IFI lends to PFIs and further on to SMEs. The purpose of this instrument is to lower the final cost of finance for SMEs in the EaP.

A3 Targeted Assistance (TA) to PFIs

This instrument consists of technical assistance to PFIs in the form of consultancy services, mentoring, and specialised training. The main effect of this instrument is that the PFIs (local banks and microfinance institutions) become more familiar with the *modus operandi* of the big IFIs, the characteristics of their credit lines, their reporting requirements, as well as the standards regarding financial and risk analysis of the potential borrowers.

A4 Capped Guarantees

This instrument consists of a guarantee given to IFIs in order to lower the risk of lending to SMEs via local PFIs through guarantees to reduce collateral requirements for SMEs. This is a guarantee that enables improved access to finance through the reimbursement of a portion of the loss caused by the SME portfolio. These guarantees are generally capped at up to 25% of the total portfolio of the respective partner financial institution and generally 70%-80% of each individual sub-loan. In the case of the DCFTA facility phase 1 EIB/ EIF, the guarantee is 25%/70%, for EIF COSME support the guarantee is 50%/70%, for DCFTA facility phase 2 the guarantee is 25%/80%.

A6 SME Incentive Grants (linked to loans)

This instrument is different from regular grant schemes as the incentive grants are not given directly to SMEs as a “pure grant”. The SME signs a loan contract from one of the credit lines of the IFIs via the PFIs. After the loan is disbursed, there is a verification process to check if the loan was used for the purpose listed in the business plan or feasibility study and of compliance with the other pre-conditions for the loan disbursement. Once the verification report confirms compliance, a part of the loan is transformed into a grant, so that the total “cost” of financing is lowered. The most common incentive grants are between 10% and 15% of the loan value as is the case for the EBRD DCFTA facility 1 and 2.

A7 Grants to SMEs

These grants are non-reimbursable and generally modest in value in order to support as many SMEs as possible. In general, SME grants are disbursed in order to target specific economic development goals such as development in rural areas, poor communities, or a response to various types of crises. These grants are usually disbursed through Non-governmental Agencies (NGOs) with links to targeted communities.

A8 Structured Funds

This instrument is implemented directly by EU participation as opposed to risk-sharing with IFIs. Typically, this involves direct loans or equity investment in a financial instrument or fund. As the EU does not have the capacity to disburse direct loans to SMEs, this function is assigned to an intermediary. The most important EU investment in Direct Finance is shares in the European Fund for Southeastern Europe (EFSE).

A9 Equity

Equity is a direct investment instrument for funding SMEs by buying participation (shares) in the respective company. This type of support instrument involves more risk and is for now it is only active in Armenia, where the EU provides a first loss guarantee for the Amber Equity Fund that invests equity in SMEs of Armenia.

Human story

[Read full story](#)

The EU provides animal-loving entrepreneurs in Moldova with business opportunities

“Our goal was to produce pet food from natural ingredients for dogs and cats. The EU support was a major boost. It helped us to buy the basic equipment.”

Dmitri Alexandrov,
entrepreneur

In Moldova, with the support of the European Union under its EU4Business Initiative, **26 young entrepreneurs** have opened and developed their own companies with the help of a business support project for young entrepreneurs on the left bank of the Nistru river and the security zone. The project, called “Mentoring in Business – 3. Start for Youth,” is being carried under the European Union’s “Confidence-Building Measures” programme, implemented by the United Nations Development Program in Moldova.

The young entrepreneurs benefited from grants of EUR 10,000, as well as counseling to expand their entrepreneurial activity.

One of the beneficiaries of “Mentoring in Business – 3. Start for Youth” is entrepreneur Dmitri Alexandrov from the village of Tirnauca, in Slobozia district. The support offered by EU4Business enabled the young man to start producing food for pets and farm animals.

Business Development Services (BDS)

BDS is the second largest area of support in Moldova representing 38% of budgets in 2022

5 support instruments used in Moldova

B2	€1.67 million	€3.77 million
B3	€0.45 million	€3.22 million
B5	€0.16 million	
B6	€0.32 million	

BDS Instruments by Type

B1 Consultancy Services for SMEs

Through this instrument, the EU4Business Initiative aims to increase directly the knowledge and skills of SMEs in EaP countries through the direct provision (fully or partly paid) of non-financial business services. These can range from basic start-up and registration, accounting, marketing, input supply, technology and product development, training and technical assistance, infrastructure support, and advocacy. These services can be delivered through both international and/or local consultants, in both private firms/ individuals, and/or business support organisations.

B2 Capacity Building of BSOs

This instrument aims at increasing the capacity of Business Support Organisations (such as chambers of commerce, SME associations, professional bodies, the Sector Trade Association, training institutes, etc) to deliver BDS services to SMEs (whether members or not). The capacity building is achieved through mentoring, training trainers, advisory services, and study tours to either enhance existing services, create new ones, or improve organisational structures.

B3 Incubators

A business incubator is an organisation designed to accelerate the growth and success of entrepreneurial companies through an array of business support resources and services that could include physical space, capital, coaching, common services, and networking connections.

The EU4Business Incubators Instrument generally shares the cost with the local authorities where the EU bears the cost of refurbishment and cost-sharing arrangements for the running costs and/or service provision. One of the most important aspects related to this instrument is sustainability. As operating costs are high, the initial financial set-up is crucial for keeping the incubators viable after the EU intervention ends.

B5 Trade Information

This instrument provides SMEs already exporting, exporting infrequently, or those interested in exporting with the range of information needed to move closer to exports. This instrument can

include generating the necessary information (brochures, guides, market reports) or developing tools for accessing online resources and intelligent searches. It covers market information, marketing guides, and market access requirements.

B6 B2B Activities

Business to Business (B2B) Activities support SMEs to make specific contact with nominally interested buyers (company decision makers in target export markets who regularly buy the product or service). These can include participation in online buyer auctions, trade fair participation, inward and outward trade missions, buyer meetings, etc. EU support can range from organisation, logistics, preparation and advice, as well as covering the costs of travel and/or stand and event costs.

Entrepreneurs from Moldova's Cahul develop their businesses with EU support

Casa Bunicului is a farm-based B&B founded in 2018 by **Dumitru and Lidia Lazar** in Pascani, a village in Cahul. With the EU4Business grant they received, the Lazar family were able to quickly add all the necessary amenities. A lot of enthusiasm, dedication and hard work turned a cold, abandoned house into a colourful, modern guesthouse that can attract international guests.

Today, Casa Bunicului, meaning Grandfather's House, is as warm and welcoming as its name and offers amazing travel experiences. What's more, the Lazar family has been able to set up a sustainable business that can contribute to the development of local agritourism.

"Casa Bunicului is a rustic tourist resort located in an area full of breathtaking natural views. Here in Prutul de Jos, there's a natural lake, Manta, and a number of wineries that attract regular tourists and wine lovers."

Lidia Lazar, entrepreneur

Business Enabling Environment (BEE)

BEE is the third largest of area of support in Moldova representing **13%** of budgets in 2022

A total of

€17.14
million

-11%

compared with 2021

4 support instruments used in Moldova

C1	C2	C3	C4
Capacity Building among Policymakers and Regulators	PPD (Public Private Dialogue)	Regulatory Reform	Information and Communication to SMEs
Through this instrument, EU4Business interventions aim at strengthening the capacity of staff of various government agencies to ensure better, more transparent, and open policies and regulations that affect business, whilst ensuring appropriate controls in the six Eastern Partnership countries. This can include making and amending policies, laws, and administrative procedures based on need and risk assessment. Through this instrument, EU4Business interventions deliver direct advisory, mentoring services, and study tours to the relevant staff involved in policymaking.	Public Private Dialogue is an instrument for more inclusive and targeted policymaking. Specifically, it involves effective consultation and collaboration between government and the private sector and/or its representatives, in order to achieve effective reform and administration of regulations that affect SMEs.	Through this instrument, EU4Business interventions support the EaP countries to improve the regulatory environment based on best practices and most often approximation (to align their SME related legislations, rules, and regulations with those of the EU). Approximation occurs in all six Eastern Partnership countries, but it is more intensely applied in the three DCFTA countries, which are committed to widespread adoption of EU business acquis under the Association Agreement (AA).	Through this instrument, EU4Business interventions support government to inform SMEs on reforms and implications for their business and steps to compliance with regulatory reform.

Allocation of BEE Budgets in Moldova by Instrument

Allocation of BEE Budgets in Moldova by Instrument

	Regional	Bilateral
C1	€0.44 million	€6.56 million
C2	€1.05 million	
C3	€4.16 million	€4.70 million
C4		€0.23 million

Aggregated Results in Moldova in 2022

In 2022, Moldova accounted for 10.5% of EU disbursements for SME support in the EaP. Of this, more than half, 59%, was for access to finance, reflecting the fact that access to funds for capital investment is a key issue for small businesses in the Republic. This is a common issue in the EaP and, by concentrating on finance, the EU is able to boost sustainable long-term growth.

In 2022, the EU disbursed **€125.37 million** to support SME growth in EaP

Supported SMEs in Moldova

had a combined turnover of

€1,667.84
million

Employed

61,310

Average annual income and employees

In 2022, the average annual income of Moldovan micro-, small and medium enterprises supported by the EU almost doubled, with a growth of 94%. If we allow for general trends, Moldovan SMEs were in the mid-range for the EaP in terms of number of employees, with a slight fall in the average. However, there was also a fall in the number of women employed.

Support to SMEs in Moldova Relative to EaP

Moldovan supported SMEs had average incomes above the EaP average and this was also true of the income per employee. In the former case, the figure was 23% higher, and in the latter, 33%. This is partly explained by the fact that there were a slightly smaller number of employees generating this income than in the EaP as a whole.

Impact of EU support in Moldova

Increase in turnover

Average increase in turnover of EU Supported SMEs in 2022

A2F BDS

In 2022, A2F in Moldova contributed to a greater increase in SME turnover than the EaP average: this was also the case for BDS. The impact of BEE is not shown as it relates to the business environment as a whole, not just SMEs.

Increase in exporting SMEs

EU-supported SMEs that started to export in 2022

A2F BDS

Regardless of the instrument used, the increase in the number of SMEs exporting from Moldova in 2022 was very modest: this was true of the EaP as a whole and may reflect disruptions in trading patterns caused by the Russia's invasion of Ukraine.

Increase in export

The increase in exports amongst EU-supported SMEs

A2F BDS

Moldovan SMEs matched or exceeded the increase in exports displayed on average elsewhere in the EaP. The benefits of BDS were particularly notable, as SMEs receiving consulting assistance showed a much higher increase. However, as the number of exporting SMEs rose only slightly, the increase may be attributed to those businesses already active in export markets.

Access to Finance in Moldova

Overall Results of A2F interventions in Moldova in 2022 were:

	2022	2021
SMEs supported with A2F interventions	4,767	1,860
